

2D Analysis

<http://help.emojot.com/help/2019/07/25/2d-analysis/>

2D Analysis report allows users to compare two questions in the same survey.

Go to the dashboard Analyze section and select 2D Analysis report.

Add Filter

Chart: Select chart type (Stack, Bar), Count/percentage and enable column value to view the value on the top of the chart.

Date: Select the particular date to view the data on the chart.

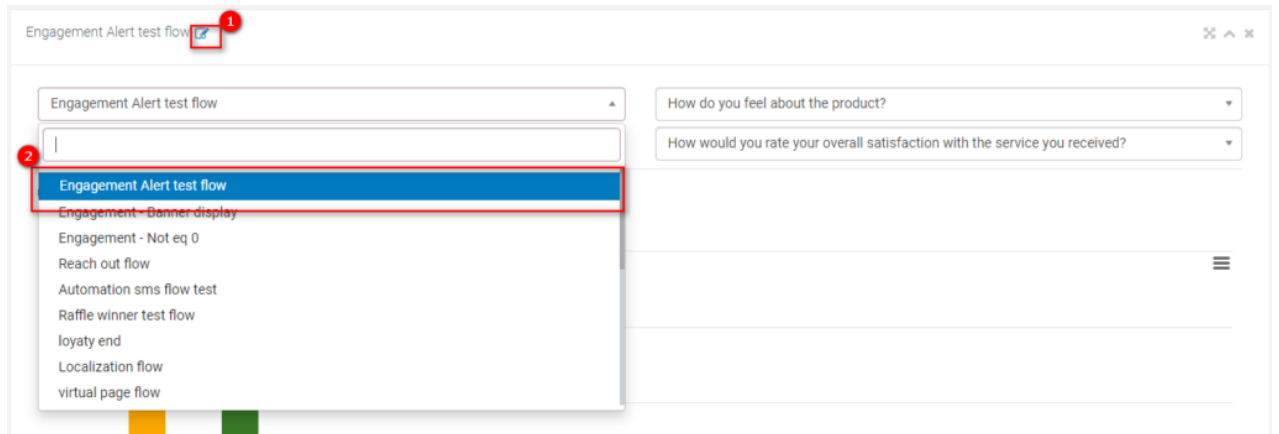

Completion: Filter the data of the completion (Partially, Completed and both)

Enterprise Hierarchy filter: Filter data according to the users' Enterprise hierarchy path.

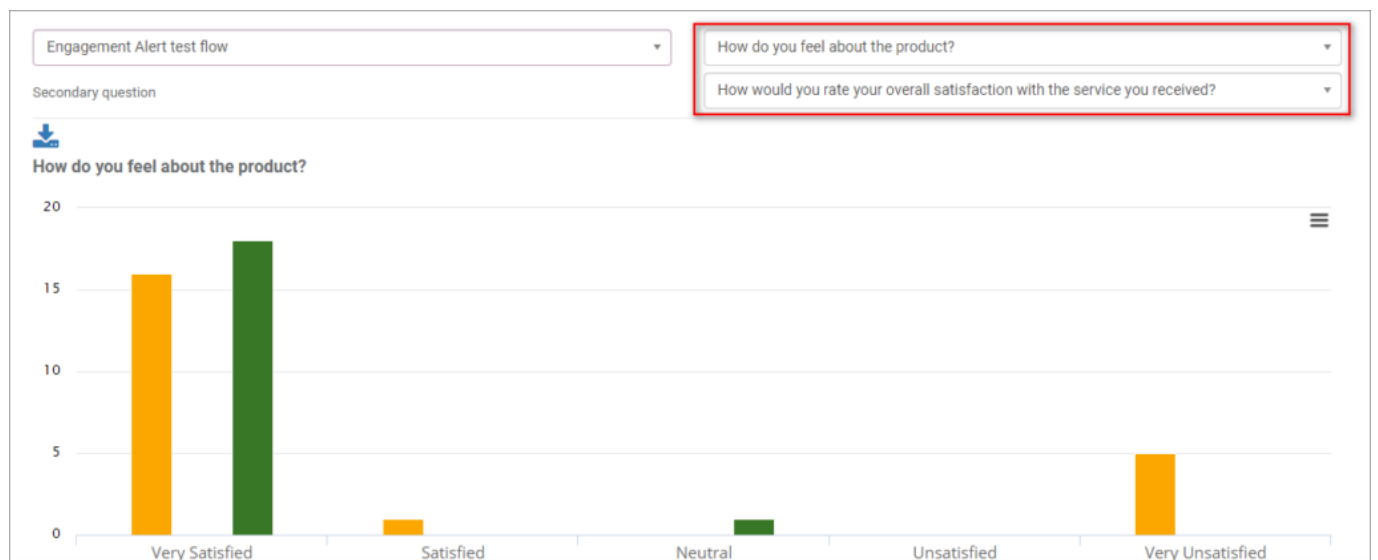

Analytics of emotes and comments

To view the analytics (emotes), click on the **Emotes** button. To select the survey, click on the pencil icon in that widget.

-

After selecting the survey, select survey questions from the drop-down to compare.

Download the chart as a png by clicking on the icon on the left top.

To view, the analytics of comments click on the **Comment** button. Select the survey and the page which contains feedbacks and the relevant question to compare.
