

# Emoting Tokens

<http://help.emojot.com/help/2019/07/25/emoting-tokens/>

Go to the dashboard **Settings** emoting token section.

## Generate tokens

To generate tokens, select the survey from the **Select survey** dropdown. Select the token type from the **Token type** dropdown.

### Token types

*Continuous :*

*If the token type selected as continuous the user would be able to reuse the generated token in the same browser.*

*Onetime:*

*If the token type selected as onetime, the user can use this token only in onetime (After user response (emote) to the survey at a one-time survey gets freeze.)*

## Token expiry dates and Token count

Token expiry dates ⓘ Starts   Ends

Token count ⓘ  ▼

The generated tokens are only valid within the selected dates. Selected token counts get generated after clicks on the **Generate tokens** button.

## Existing token URL(s)

All the generated tokens are showing in the **Existing token URL(s)** section. If the particular URL is already used user can view the status as **Used**. Clicking on the clear button user can use that URL again.

• Existing token URL(s) ^

| <input type="checkbox"/> | Token                  | Url  | Token type | Status   |                                      |
|--------------------------|------------------------|--|------------|----------|--------------------------------------|
| <input type="checkbox"/> | 1571895223027104752165 | https://emojot.com/sssc?<br>loginRequest=Anonymous&emotingToken=1571895223027104752165 | continuous | Used     | <input type="button" value="Clear"/> |
| <input type="checkbox"/> | 1571895223030195945632 | https://emojot.com/sssc?<br>loginRequest=Anonymous&emotingToken=1571895223030195945632 | continuous | Not Used |                                      |

## Delete Selected

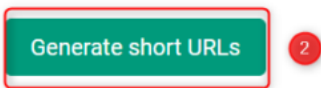

To delete the particular URL/s select the checkbox of that URL and click on the **Delete selected** button.

### Generate short URLs

To generate short URLs select the checkbox of the particular URL and click on the **Generate short URLs** button. The **Generated short URL** gets opened in a new window and clicking on the copy icon, the short URL gets copied to the clipboard
